

ABIY  
SEIFU

FRONT-END  
ENGINEER

## Introduction

My passion lies in client side technologies but I'm also comfortable with working with server side technologies. I have a solid understanding of working with service oriented architectures and embrace the API centric web.

Aug '13  
Present

### Nitro Software, Front-end Developer

Helped ship 5 high traffic localized sites supporting 12 languages, 1.5 MM monthly unique visitors, and processed \$250K weekly / Integrating 3rd party APIs crucial to the business / Writing and maintaining our growing JavaScript library / Developed templates to quickly generate revenue critical SEM campaigns, in-app promos and marketing emails / Helped mentor junior team members
